DETAILED ACTION

Page 2

Response to Arguments

1. Applicant's arguments filed 5/8/06 have been fully considered but they are not persuasive. Applicant argues Guidotti does not disclose the claimed invention because the barrier layer of Guidotti is inserted into a central section of a layer and the present invention defines the barrier layer as being at an end edge. However, applicant has not defined the transverse end edge with respect to the structure. The examiner is interpreting the transverse end edge at the edges in the transverse direction of the core, along the crotch region of the core. The barrier layer of Guidotti is arranged at or in close proximity to one transverse end edge of the fluid receiving layer as shows in Figure 1 at areas designated as 10.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

Application/Control Number: 10/671,541

Art Unit: 3761

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-8 and 10-16 are rejected under 35 U.S.C. 103(a) as being unpatentable 4. over Guidotti et al. USP6123692. Guidotti et al discloses an absorbent article as shown in Figures 1, 3, and 4 having a fluid receiving layer 1, a fluid storage layer 19, a fluid distribution layer 18, and a fluid barrier layer 11,21, which is arranged at or in close proximity to one transverse edge of the fluid receiving layer 1, the one transverse end edge being located in or adjacent the crotch portion 6, Figure 1. Guidotti does not disclose the distribution layer is absent in a substantial part of the article. However, Guidotti discloses the distribution layer has larger pores in the rear portion to enable the rear portion to receive loose feces and to prevent rewetting (col. 4, lines 50-56). It would have been obvious to one having ordinary skill in the art to modify the acquisition layer to be absent in a substantial part of the rear portion to promote the absorption of loose feces in the rear area and to contain discharged liquid in the front portion for transporting to the underlying storage layer, which Guidotti teaches is desired (col. 4, lines 24-31). Doing so would provide a means to separate urine and fecal matter to prevent skin irritation.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacqueline F. Stephens whose telephone number is (571) 272-4937. The examiner can normally be reached on Monday-Friday 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tanya Zalukaeva can be reached on (571) 272-1115. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
